Reliable in any deployment under any condition.

Entiffic AIR *portable box* is a mobile self-powered compact heater which is self-sustaining with electric power. The heater keeps cabins warm and even charges the build in battery, offering the user full autonomy.

Entiffic AIR *portable box* is ideal for the longer off grid deployments – focusing on minimal upkeep from the user. The built-in 10 l fuel tank offers up to 50 hours of continuous runtime before refuelling is needed.

Entiffic AIR *portable box* is built in to a sturdy light weight aluminium case, designed to provide heat during even the harshest conditions.

The unit is supplied with a thermostat which can be extracted to measure temperatures within tents, cabins, and similar enclosures.

- Easily operated
- Built for everyday use
- No external power source needed
- Indoor and outdoor operation

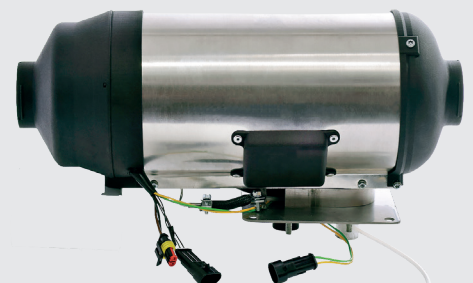

Dimensions of box:

W 200 mm x L 387 mm x H 365 mm

Weight:

14,5 kg (empty tank)

Off-grid:

The ENTIFFIC portable box offers a unique flexibility for users in off-grid environments.

With 50 hours of uninterrupted wireless operating time, the device provides great flexibility for both every day and critical situations.

Turn it on and direct the air flow where you need it - it's that simple.

Put on a Ø 60 flexible hose to direct the air flow into confined areas e.g. tents, cabins and or even mobile units.

WITHOUT Mains:

Entiffic Air Portable is an excellent heat source that can be used without the need for a mains power supply.

Tents, cabins, vehicles, trailers and other areas that need warm air for a period of time can benefit from the units' flexibility. Route the exhaust hose out into the environment. The device can then keep the desired area warm. It is also possible to regulate the room temperature with the built-in thermostat.

Mobile:

The Entiffic Air Portable is a robust and strong tool that is very useful to have in any rescue vehicle. When transporting life or equipment, which needs essential heat during transport the ENTIFFIC Air *portable box* will support while in transit.

Specifications:

Max heat output:	2,0 kW forced air heat
Voltage:	12V DC
Battery:	12V DC 9Ah sealed lead acid
Tank:	10 l (approx. 50 hours runtime)
Dimensions:	W 200 mm x L 387 mm x H 365 mm
Weight:	
Dry:	14.5 kg
Full:	24.5 kg
Fuel consumption:	0,2 l/hour
Fueltypes:	
-20°C and higher:	Diesel
-20°C or lower:	Petroleum, Jet A-1 aviation fuel
